

## Cuff Links

If for any reason any pair of cuff links made by us is not satisfactory, we will give you a new pair. This is the guarantee that goes with each pair. We believe we make the best cuff link to be had. Our modest prices make buying easy.

### BOYD PARK

MAKERS OF JEWELRY  
100 MAIN STREET SALT LAKE CITY

### BARGAINS IN USED CARS

50 splendid used cars—Buicks, Oldsmobiles, etc.—mediate \$1200 to \$2000. Guaranteed first class running condition—easy terms if wanted by cash or credit. Write for details and description. Used Car Dept., Randall-Dodd Auto Co., Salt Lake City.

## DEEM PICTURE OUT OF PLACE

British Authorities Request Removal of Kaiser's Portrait From Tonga King's Palace.

Germany's interesting relations with the little kingdom of Tonga in the South Pacific are recalled by recent incidents there. A few years back a life-size portrait of the Kaiser mounted within a massive gilt frame was presented by the German government to King George Tupou II, the present ruler of the archipelago. Forthwith this picture adorned the walls of the wooden palace at Nukunofa, the capital of the kingdom. Germans—who, shortly before the war, were rather conspicuous in Tonga—were wont to admire the painting when they came to pay their respects to King George. Moreover, close at hand were busts of Emperor Frederick of Germany and Prince von Bismarck. So delightfully informal in many ways is the Tongan court that the busts did excellent service as hat racks on festive occasions. But not so with the present from the "All Highest." But alas for the big picture of the Kaiser in Little Tonga! After the war had been in progress for some time the fact of its existence and whereabouts came within the purview of the British government and that government requested the Tongan government to remove it from the palace. The pith of this request was that Tonga is a British protectorate. But notwithstanding Tonga is a British protectorate it is the last independent kingdom in the Pacific and it prides itself on having not only a monarch but a cabinet and a parliament.—New York World.

## HISTORY WROUGHT IN STONE

Marvels of French Architecture Which the Uncivilized Hordes of Germany Would Destroy.

In architecture France is supreme. It well may be said that without France there would have been no Gothic architecture. The cathedrals of France are absolutely unrivaled, says Cass Gilbert in the World's Work. One has only to mention the names of Notre Dame de Paris, Bourges, Reims, Chartres, Rouen, Amiens, Ecouval and Coutances to bring up memories of miracles of creative design which no words can fittingly characterize or describe.

Wonders of constructive ingenuity as they are, they have a yet more supreme significance as evidence of the refinement and taste of a people instinct with emotion and ennobled by idealism in its most exalted phase. These great buildings give expression to the spiritual aspirations of a great people.

They are constructions of superb scale and fascinating beauty, embellished by tracery and arabesque, carrying and inlay, stained glass, tapestry, bronze and iron of marvelous craftsmanship and exquisite design. They are the product of a thousand years of faultless taste, the contribution of innumerable thousands of craftsmen devoted to the glory of God and the love of France. And it is this glorious nation that the hordes of Germany would destroy.

### Within Sound of the Guns.

A new sound arose in the darkness, a sound which held for me a thrill as vital and incomparably more alluring than the hint of distant battle. It rose slowly, a rich, mellow undulation, which stirred every fiber, and then quavered, depended and broke off. We stood motionless, listening with all our ears, and again it came, unmistakably, from the depths of the misty woods. My companion smiled at me in triumph. His first surprise had come off promptly, even ahead of time, for it was only now growing dusk. We could see in imagination the drooped tail, the hollow-cheeked muzzle raised skyward—a wolf uttering that cry which of all sounds is most symbolic of the northern wilderness; an unharmed plaintiff et lugubre. I could not believe my ears, that here in the heart of France, within sound of the guns at the front, I had heard the voice of a wild wolf.—William Beebe in Atlantic.

### Expert at Triest Sport.

One method the Zual practice for keeping in trim is their tribal sport, which was witnessed for the first time by a number of Americans at the recent ceremonies. The game is known as "kick-the-stick," and is a sort of hockey played with the bare feet. The stick is a bit of wood three or four inches long, and each team tries to kick it down a long course to a goal. So expert are the players and so fast do they travel, that a number of spectators wore out their horses trying to keep up with the game.

## MINES AND MINING

Shipments of first-class ore and mill product from the mines of Park City last week totaled 1789 tons. This aggregate is estimated at \$100,000. The shipment of premium spelter by the Judge is roughly placed at near \$11,000.

It is announced that the Mexican government has for the time being practically suspended the oil decree which, according to American oil interests in Mexico, amounted to a confiscation of oil properties by the government.

According to a statement issued by the Michigan-Utah Consolidated Mines company, the chief significance of the new strike in the property lies not only in the development of a large body of ore, but also in evidence of permanency.

More business is being carried on in the oil fields of Mexico than previously, is an eastern comment on oil business. American interests have recently brought in several good wells and increased their manufacturing capacity there.

Alaska gold made a loss of \$11,947 on the 300,249 tons milled during the quarter ended June 30. The tonnage milled was 1821 per day less than in the preceding quarter. The mill-feed assayed \$1.16 per ton, as compared with 59 cents in the first quarter of the current year.

The Apex Standard Mining company, with property located in the western end of the Tintic district, has begun the sinking of its new shaft at a point a short distance east of the Montana company's shaft house and nearly due east from the portal of the Iron King tunnel.

The statistics of the production of potash for the first six months of 1918 received by the United States geological survey, department of the interior, to date show a total output of 20,000 to 25,000 short tons of pure potash (K<sub>2</sub>O), indicating that the output for the entire year may reach 50,000 to 60,000 tons.

The Grandma sump crosscut has been advanced to a point 100 feet west of the shaft and will be continued to the west side line of the Grandma ground to prospect this territory at a depth of 815 feet, says the Goldfield Tribune. The face is now in quartz and assays running to \$1.30 in gold have been obtained recently.

Mining is a wasting industry, says the Mining Congress Journal. To the extent that it produces it reduces the original estate. Its invested assets are continually growing less. It is peculiar, in another sense, in that it is a short-lived industry and an industry carrying great hazards. All of the possible supply of minerals for all future time is now in existence.

The American mining engineer wants to know what further duties lie in his path toward helping to win the war. This has been the keynote of the 117th meeting of the American Institute of Mining Engineers at Colorado Springs. No war-winning effort has proved too strenuous for the mining leaders of the country who have spent the week in this district.

Announcement was made September 5 that the directors of the Eagle & Blue Bell Mining company had declared the regular quarterly dividend of 10 cents per share, \$90,000 in all, payable September 20 to stock of record September 19. This will bring the total dividends for the current year up to \$270,000, while in 1917 the company paid \$360,000 and in 1915, \$135,000.

After the steady prosecution of development work during a cessation of shipments for the last few weeks, owing to lack of transportation facilities, the Imperial Lead Mining company, which has fifteen claims in the West Tintic range of mountains, Tintic mining district, has completed arrangements for maintaining a steady output of ore throughout the season.

The Silver Queen Leasing company, operating on a group of claims in the western part of Utah, about thirty miles east of Wendover, has received returns from a small consignment of ore. It being the first marketed from the property, and was sent out as a trial shipment. The ore carries silver and copper, and returns from the first car brought a little better than \$23 per ton after freight and smelting charges had been deducted.

The week's record of ore output from the Tintic district shows a total of only 153 carloads, a considerable decline from the showing made the preceding week, and the average of several weeks previous. Information from Eureka is to the effect that generally speaking the mines of the district are in a position and condition to turn out more ore of shipping grade than at any time in many months, but that a shortage in cars for transportation has caused an unavoidable delay in transferring the product from the mines to the smelters.

Shipments of ore to mill by the mines of Tonopah the past week totaled 9083 tons valued at \$169,811.

It is understood that some new copper refining arrangements have been entered into, calling for the payment of from \$24 to \$26 a ton of material against what was formerly a normal charge of from \$13 to \$14. Such high tariff would, however, apply only to new business.

One of the directors of the Wasatch Mines company announces that the latest word from the tunnel work is that the miners have reached a point approximately 2065 feet in. They have lately been making headway at the rate of five feet a day.

## LARGEST LINE OF ARMY AUTO TRUCKS MAY BE USED TO RELIEVE FREIGHT CONGESTION

A line of army automobile trucks that has not been surpassed in size anywhere may be used to relieve the congested freight condition of the railroads. This picture shows a long line of the trucks en route to a large city in the United States.

## CARBURETOR IN SUMMER SEASON

Ordinarily There Is Not as Much Gasoline Required Then as During Winter.

### USE OF COLD AIR ENTIRELY

Always Good Judgment to Inspect Radiator Frequently, Making Sure Water Is Not Running Low—Grease Collects Dust.

One of the things demanding the attention of the auto owner in summer weather is the care of the carburetor. Ordinarily there is not as much gasoline required in hot weather as in cold and therefore, the dash adjustment may be carried a little nearer lean, or air, side. This not only saves gasoline but increases the power of the motor. In the majority of instances it has been found that the hot air stove of the carburetor may be dispensed with or adjusted.

### Prevent Hot Air.

As a rule provision is made on the hot air stoves for allowing some cold air to enter, or to take cold air entirely. Where the carburetor is water-jacketed, it is usually supplied with a valve that may be closed to prevent the flow of hot water. Individual experiment will determine whether it is advisable to cut out the heat entirely on the carburetor, since all are not benefited by the change. If the fan has been disconnected this of course will be corrected. The engine naturally runs hotter in the summer time, the water vaporizes faster and often boils away, so it is always good judgment to inspect the radiator frequently, making sure that the water is not running low. Water in the storage battery will evaporate twice as quickly in summer.

### Heavy Grease for Summer.

Many manufacturers recommend a heavier grease for summer than for winter in order to obtain the greatest efficiency. Hot weather softens up grease and trouble often manifests itself by grease seeping out of transmission or differential cases, as well as from grease cups. When the grease softens in this manner it invariably makes a little ring of grease around each cup which collects dust and gives the car an unkempt appearance; there is also the possibility of some of the dust working into the bearings. Be sure to keep the grease cups turned down and in that way the dust is forced out. They should be wiped off carefully. It should be remembered that every bearing needs additional care in the hot weather to keep the dust out and the lubricant in, but the motorist who attends to these little "extras" will be doubly repaid in expense saved and in comfort and freedom from those annoying stops on the road which so often result in an unnecessary visit to the nearest garage. The motor-wise driver realizes from past experiences that hot weather calls for added forethought and precaution.

### To Prevent Jumping Lever.

Unless you keep your hand on the gear shift lever until you are sure the gears are in mesh, it may jump back into neutral, bothering you greatly. It is a good plan to keep your hand on the speed lever until you have finished with it. Then, too, you must watch the road while you are changing from one speed to another, and you cannot do this if you have to look down and find the speed lever several times.

## CLUTCH IS NEGLECTED PART

Service of Thrust Collar and Lever Require Frequent Lubrication by Hand.

One of the most commonly neglected parts of the car, as far as lubrication goes, is the clutch operating mechanism. In the case of disk clutches running in oil the lubrication of the thrust collar and the lever operating it is automatic. But with clutches that do not operate in a bath of oil, the thrust collar and lever require oiling by hand. The service of these parts is exacting and frequent lubrication of the ball thrust bearing and of the end of the lever which actuates it is necessary. Furthermore, the bearing of the clutch pedal and the pins which secure the clutch operating linkage should be lubricated frequently.

## TO CLEAN BRASS CASTINGS

Dip Into Solution of Sulphuric and Nitric Acid and Salt—Rinse in Clean Water.

Brass castings may be cleaned in an instant by dipping them into a solution of three parts of sulphuric acid and three parts of nitric acid, to which, after they have been mixed, there has been added one part of common salt, the whole being stirred until the salt has been dissolved. If this mixture is placed in an earthenware vessel, the brass castings can be dipped in it, removed immediately, and rinsed in clear water. The castings can be made as bright as new by this method and little labor is involved.

## CASING FOR PNEUMATIC TIRE

Object of Recent Invention Is to Prevent Punctures and Undue Expansion by Strains.

The Scientific American, in illustrating and describing a pneumatic tire casing invented by A. Cartheuser of West Orange, N. J., says:

Among the objects of the invention are to protect a pneumatic tire from being punctured, to provide a frictional tread protected from puncture and supported in service by the pneumatic

Perspective View Showing the Casing Associated With Tire.

tire, to provide a wearing surface having a number of independently movable members, each directly supported by the pneumatic tire, to provide a solid metallic casing for the pneumatic tire for preventing undue expansion by internal strains.

## CRUSHES KEEP TIRES CLEAN

Small Device Mounted on Mud Guards Remove Grit and Other Material From Treads.

Brushes mounted on the mud guards of a motorcar or other vehicle, to remove grit from the treads, have been developed as a means of increasing the mileage. The brushes rest lightly against the tires and as the wheels revolve brush off grit and other material, which would cause wear, if allowed to adhere to the treads.

We will win this war— Nothing else really matters until we do!

The Flavor Lasts

### Killing Burdocks.

An experienced gardener says that a good way of exterminating burdocks is to cut them off close to the ground just before they go to seed, then apply a little kerosene to the root. He uses a common machine oil can for applying the oil.

### Heal Baby Rashes.

That itchy, burn and torture. A hot Cuticura Soap bath gives instant relief when followed by a gentle application of Cuticura Ointment. For free samples address, "Cuticura, Dept. X, Boston." At druggists and by mail. Soap 25, Ointment 25 and 50.—Adv.

### He Couldn't Spell It.

In the spelling list for a class in a certain Indianapolis school were the words singing and singeing. The class was asked to write sentences using these words to show that they knew the correct meaning of each. One little fellow, Robert, wrote: "The Italians are a singing nation." "The allies will soon be singeing the beard of the Kaiser."

With sideward glances he watched his teacher mark his paper and timidly asked:

"Is it all right?"

"Yes," she said, "but the Kaiser has no beard; he has a mustache."

"I know, I know; but I wanted 100 on my paper, and I couldn't spell mustache."—Indianapolis News.

### Hot Stuff.

One negro porter was getting enthusiastic over cigars. "Brother," he said to his companion, "when I die I want a box of cigars tucked under one arm."

"What kind do you prefer?" asked the other.

"Just anything. A 27-cent near-Havana will do."

"Near Havana? Say, when you're dead for two days you'll think Havana used to be as cold as the winds that blow over Greenland's icy mountains."

A woman's voice isn't necessarily heavenly because it sounds unearthly.

Americans are touring New Zealand in increased numbers.

## POST TOASTIES

Everything a corn food ought to be—and saves the wheat

says Dobby

### Not a New Experience.

Two recruits were waiting for further instructions at Camp Dodge, Ia. One of the men, striving to be sociable, said: "Well, I suppose this war business will be new work to us." "O, I don't know," replied the other. "You see, I have been married to the wrong girl for five years."

California hopes to presently irrigate 5,490,300 acres of land.

Ohio farmers are forming co-operating buying societies.

## Keep Yourself Fit

You can't afford to be laid up with sore, aching kidneys in these days of high prices. Some occupations bring kidney trouble; almost any work makes weak kidneys worse. If you feel tired all the time, and suffer with lame back, sharp pains, dizzy spells, headaches and disordered kidney action, use Doan's Kidney Pills. It may save an attack of rheumatism, dropsy, or Bright's disease. Doan's have helped thousands back to health.

### A Utah Case

W. W. Robinson, First East St., near First North St., American Fork, Utah, says: "For months I suffered from a steady ache across my kidneys. The least move that caused a strain on my back sent a pain through me. A doctor recommended Doan's Kidney Pills and I tried them. They fixed me up all right and I have only needed them once since then. At that time they again brought me as good results as before, quickly relieving the pain."

Get Doan's at Any Store, 60c a Box. DOAN'S KIDNEY PILLS. FOSTER-MILBURN CO., BUFFALO, N. Y.

## JUDGE DECIDES STOMACH REMEDY A GREAT SUCCESS

Commissioner of Mediation and Conciliation Board Tries EATONIC, the Wonderful Stomach Remedy, and Endorses It.

Judge William L. Chambers, who uses EATONIC as a remedy for loss of appetite and indigestion, is a Commissioner of the U. S. Board of Mediation and Conciliation. It is natural for him to express himself in guarded language. Yet there is no hesitation in his pronouncement regarding the value of EATONIC. Writing from Washington, D. C., to the EATONIC Remedy Co., he says:

"EATONIC promotes appetite and aids digestion. I have used it with beneficial results."

Office workers and others who eat much are martyrs to dyspepsia, belching, flatulence, heartburn, poor appetite, bloating, and impairment of general health. Are you, yourself, a sufferer? EATONIC will relieve you just as surely as it has benefited Judge Chambers and thousands of others.

Here's the secret: EATONIC drives the acid out of the body—and the Bloat Goes With It! It is guaranteed to bring relief or you get your money back! Costs only a cent or two a day to use it. Get a box today from your druggist.

W. N. U., Salt Lake City, No. 37-1918
